

Million Women Mentors (MWM) Connecticut Chapter convenes partnerships with local youth-serving organizations, academic institutions and corporations committed to supporting women and girls to pursue and persist in STEM by establishing mentoring opportunities.

Today, women make up

52% of the college-educated workforce

but only

29% of the STEM workforce¹

50% of women in STEM careers drop out of their field within the first 12 years²

MWM is an initiative of STEMConnector, a collaboration of over 85 national partners, 60 corporate sponsors and teams in 44 states, all working toward the goal of growing and deepening our network of Science, Technology, Engineering and Math (STEM) mentoring relationships to girls and women.

The **top priorities** for the **MWM-CT** chapter are to:

- Recognize the value of mentoring early in the professional career to retain and advance women in STEM fields
- Promote STEM in grades K-12 to ensure the interest and engagement in STEM activities continues throughout the learning continuum
- Increase mentoring among minority women and young girls to create equity and faster interest early on in STEM fields

Help CT lead the Nation in Changing the Numbers!

“For too long, women have been underrepresented in the fields of science, technology, engineering, art and mathematics. Through MWM-CT we are expanding access to the resources needed to unlock their full potential.”

Lt. Governor Susan Bysiewicz, MWM-CT Honorary Chair
